

SPEAKER BIOGRAPHY – DISA SEMINAR – 29 JUNE 2017
BIRMINGHAM HIPPODROME THEATRE

KEN MUNRO

Ken is a highly respected speaker. His presentations at Infosecurity Europe, found him performing practical hack attacks on the company stand. He is a regular speaker at events held by industry bodies and associations. He's also an Executive Member of the "Internet of Things Security Forum", a body that aims to promote best security practice and the application of controls in smart device manufacturing, and spoke out on IoT security design flaws at the forum's inaugural event.

Ken has a wealth of experience in penetration testing but it's the systems and objects we come into contact with on an everyday basis that really pique his interest. This has seen him hack everything from hotel keycards, to keyless cars and a range of Internet of Things (IoT) devices, from wearable tech to children's toys and smart home control systems. This has gained him some notoriety among the national press, leading to regular appearances on BBC TV and BBC News online as well as the broadsheet press, and he's also a regular contributor to industry magazines, penning articles for the legal, security, insurance, oil and gas, and manufacturing press.

IAN GLOVER

Ian Glover has thirty six years' experience in information technology and has specialised in professional services for the last twenty eight years. Ian is the President of the Council of Registered Ethical Security Testers (CREST) (GB). CREST is a not for profit organisation that promotes research and development in standards for professional technical Information Assurance practices. CREST serves the needs of an information security marketplace that requires the services of regulated and professional security professionals. Ian was the elected Chairman of the CLAS Forum. CLAS is a partnership linking the Information Assurance knowledge of the UK Government with the expertise and resources of the private sector. It provides a pool of more than 800 high quality consultants approved by CESG to provide Information Assurance advice to UK Government departments. The Forum was established to promote the interests of the CLAS community.

JOHN BAYLISS

CRM (Communications Risk Management) specialises in delivering Threat Awareness Presentations. It is generally agreed that education is the most important aspect of protecting your information. Some attacks are almost impossible to mitigate against, so knowing what form an attack might take is critical. CRM have 15 years' experience in lecturing to Government, Military, Police, the Private Sector and Royalty, having briefed in excess of 300k people in that time. Subjects covered include: TEMPEST; Cyber; Mobile devices and Espionage. Should further assistance be required, CRM can put you in touch with leading experts in their fields. John was awarded the Operation Iraqi Freedom medal in 2003.

STUART GREEN

Stuart Green, the driving force behind SJG Digital, one of the most active cyber-security specialists in the UK. Stuart regularly speaks at forums, seminars and events giving interactive presentations.
